

## MECHANICAL HANDLING INSPECTION AND CERTIFICATION

DALAZ Conduct Inspection, Testing and Certification for Pad Eyes and Monorail on YinSon Gas Injection Compression Module. This module is a part of Ghana's OCTP Development Project. The operation will be located in the Tano Basin, approximately 37 miles (60 kilometers) off the coast of Ghana.

### PROJECT SCOPE:

- Mechanical Handling Study
- Inspection, Testing and Certification
- Comply With LOLER 1998 & DNV

### CHALLENGES:

Tight schedule made our team prepare everything in short time and still, safety and quality are our priority.

### PROJECT COMPLETION:

Job successfully completed on schedule without any harm or incident. Our priority are to bring excellence inspection and certification as client satisfaction.

### DALAZ COMMENT:

"Small space working area difficult for us to run the testing, but with a good team work everything can be settled."

(S. B. Adrianto, DALAZ Operational Coordinator)

### CLIENT FEEDBACK:

"DALAZ doing excellence job with the best solution on inspection and testing for pad eyes and monorail"  
(Syafri –QA/QC Inspector VME Process)
